AN ACT

MODERNIZING PUBLIC HEALTH INFRASTRUCTURE, PROVIDING FUNDS FROM THE PHILIPPINE AMUSEMENT AND GAMING CORPORATION (PAGCOR) INCOME, AMENDING FOR THE PURPOSE PRESIDENTIAL DECREE NO. 1869, AS AMENDED BY REPUBLIC ACT NO. 9487

Explanatory Note

An overview of the Philippine Health Sector Reform in the Philippines described the country's health sector as one that exists in the context of persistent poverty and financial challenges¹. As the population continues to grow, public health spending becomes inadequate. Most of our public hospitals have deteriorated in terms of available medical equipment and facilities as compared to their private counterparts. Such condition affects the quality of healthcare and services that they provide to the Filipino people particularly the poor.

On the other side of the spectrum, there is quite a number of Government Owned and Controlled Corporations (GOCCs), including the Philippine Amusement and Gaming Corporation (PAGCOR) that has been in the spotlight in the recent past due to controversies involving the alleged misuse of their funds.

Findings of the previous PAGCOR management indicted the Corporation's former officials for transgressions in the use of its income in the past few years. Other anomalous transactions were noted including the use of revenues for partisan activities and failure to allocate and remit the mandatory contributions to beneficiaries. Likewise, some of the mandated contributions out of PAGCOR's income have now become obsolete because the Corporation's Charter has not been amended since the year 2007.

This bill proposes to amend the PAGCOR charter by allocating the 50% share of the national government in the aggregate gross earnings of the Corporation to fund the modernization of public health infrastructure, specifically of all district, provincial and regional hospitals in the country. This allocation is meant to improve the quality of healthcare that the public hospitals deliver by modernizing their medical equipment and facilities, supporting their possible increase in bed capacity and providing additional funding for the procurement of necessary medicines.

The necessary requirements for personal services in line with the said modernization of public health infrastructure shall be included in the General Appropriations Act under the Department of Health.

With PAGCOR funds used to finance the modernization of public health infrastructure, the financial challenges in public health sector and the issues on transparency and effective utilization of the Corporation's income shall be addressed.

In view of the foregoing, the approval of the bill is earnestly sought.
