House Bill No. **4093**

Introduced by: Rep. ARNOLFO A. TEVES, JR.

**AN ACT MANDATING THE AUTHENTICATION OF
ONLINE AND SOCIAL MEDIA MEMBERSHIPS IN THE COUNTRY
THROUGH REGISTRATION OF THEIR ACCOUNTS USING ANY VALID
GOVERNMENT-ISSUED IDENTIFICATION
AND/OR BARANGAY CERTIFICATE**

EXPLANATORY NOTE

This bill seeks to require a mandatory authentication process for all social media and other similar online accounts enjoyed by users in the country. It aims to address cyber bullying, harassment, online scam, libel and even illicit drug trade and prostitution by holding individuals, private and public entities accountable for their online interactions. To verify identities, online social networking services will be obliged to require their users, whether resident or non-resident, to supply and link their accounts to the valid identification numbers provided by the government.

Social media platforms are indispensable tools for disseminating information especially those that concern corruption, mismanagement and the poor quality of service in different levels of government. They have made it tremendously easy to collect information pertinent to the public interest from individuals. They have also brought together people from all walks of life and helped them bring into fruition projects that benefit communities.

While the country has greatly benefitted from this bridging of both public and private spheres, like any other tool, the social media has been used as a mode to bully and harass individuals and institutions. In 2013, a Google Trends report revealed the Philippines was

the fourth highest country in terms of cyberbullying searches. In a 2015 survey by the Stairway Foundation, Inc., 60 percent of Filipino children aged 7 to 12 and 80 percent of teenagers aged 13 to 16 revealed themselves victims of bullying through social media. Furthermore, 30 percent of children aged 7 to 12 and 40 percent of teenagers aged 13 to 16 knew of others being cyberbullied. Sixty percent of children said they could confide to their parents while only 34 percent of teenagers said they could.

The Cyber Crime Act has not curbed cyberbullying and harassment because it is in spirit libel law extended to the realm of the Internet. The Cyber Crime Act does not address the issues of traceability and accountability that should be inherent in social media accounts from the point of registration. Hence, it is imperative that the government take measures to enhance accountability for online interactions and take steps to document wrongdoing in the near future. By doing so, Filipinos specifically the youth will enjoy more secure social networking platforms as well as productive and informative interactions.

In view of the foregoing, the immediate approval of this bill is earnestly sought.
