EXPLANATORY NOTES

Article XIV, Section 3, Paragraph 1 of the Constitution mandates that we include the teaching of the Constitution in our educational institutions’ curricula.

This bill was crafted precisely for that purpose by mandating the integration of a constitutional education course or program in our secondary educational system.

This bill seeks to educate our Filipino youth on the fundamental law of the land to accomplish the following:

a. Raise the level of awareness and understanding of our Filipino youth of the history and provisions of the 1987 Constitution as well as their rights and duties as a Filipino citizen;

b. Develop their appreciation and exercise of democratic values, such as transparency, accountability, and respect for human rights and dignity;

c. Foster their understanding and practice of active citizenship and people’s participation in government processes;

d. Equip them with the knowledge of the Constitution that they can use in their analysis and involvement in public issues;

e. Develop their understanding of the different government branches, institutions, processes, and constitutional commissions;
f. Promote the role of government in society and respect for institutions and the rule of law;

g. Equip them with the proper skill and knowledge to discern useful socio-political news and information from false ones in this age of technology; and

h. Promote a more meaningful and effective civic engagement.

This bill mandates all public and private schools to teach a Constitutional Education course or program at the Grade 10 level (age 16). Grade 10 is the ideal level as students are not yet preoccupied with college applications. In addition, not all students are able to progress to Senior High School level with poverty as the prevalent cause. Further, in terms of cognitive ability, research shows that at age 16, teens are developing the “ability to think abstractly, deal with several concepts at the same time, and imagine the future consequences of their actions. They learn to process more complex problems, to develop and test theories, to understand analogies, to reason inductively and deductively, and to think inferentially. They are better able to handle a more demanding high school curriculum because their memory and organizational abilities—such as time management, test preparation, and study skills—improve. Written and spoken language become more and more sophisticated. They may also begin to grasp political, moral, social, and philosophical concepts.”¹

Immediate passage of this bill is earnestly sought.
