SECTION 1. Short Title. - This Act shall be known as the "Comprehensive Renal
Replacement Therapy Act."

SEC. 2. Declaration of Policy. - It is the declared policy of the State to make available
essential goods, health and other social services to all citizens at affordable cost and
to deliver medical care to indigents free of charge. Pursuant to this, the State shall
continually improve the delivery of health services and hospital facilities to make those
accessible to all.

In line with this policy, the State shall adopt an integrated and comprehensive

replacement therapy for patients who are diagnosed with End Stage Renal Disease
(ESRD).

SEC. 3. Definition of Terms. – As used in this Act:

to indigent patients and disseminates information on the various forms of
renal replacement therapy such as kidney transplantation, peritoneal
dialysis and hemodialysis;

b. End Stage Renal Disease or ESRD refers to the final stage of chronic
kidney disease in which the kidneys no longer function well enough to
support the needs of a patient’s daily life;

c. Hemodialysis or HD refers to a medical procedure to remove fluid and
waste products from the blood and to correct electrolyte imbalances using
a synthetic membrane or dialyzer which is also referred to as an “artificial
kidney”;

d. Indigent refers to a patient who has no source of income or whose income
is not sufficient for family subsistence as identified and assessed by the social
worker of the Department of Social Welfare and Development (DSWD) or
the social worker of the concerned local government unit;
e. **Kidney Transplant or KT** refers to a surgical procedure to place a healthy kidney from a living or deceased donor into a person whose kidneys no longer function sufficiently to sustain the person's life;

i. **PD First Policy** refers to the policy where peritoneal dialysis, when feasible, is offered as the first dialysis modality to RRT patients;

j. **Renal replacement therapy or RRT** refers to a therapy that partially replaces the functions of the normal kidney. This may be in the form of kidney transplantation, peritoneal dialysis, and hemodialysis.

**SEC. 4. Establishment of Dialysis Services Wards or Units in National, Regional, Provincial Government Hospitals.** - Within five (5) years from the effectivity of this Act, all national, regional, and provincial government hospitals, including all stand-alone dialysis facilities shall establish, operate and maintain a dialysis service facility in their hospitals. These dialysis facilities shall have all the necessary dialysis machines, equipment and supplies. The same hospitals and dialysis facilities are mandated to train nephrologists, dialysis nurses, dialysis technicians, and operating room nurses in both peritoneal dialysis and hemodialysis.

All national, regional, and provincial government hospitals, including all stand-alone dialysis facilities shall have a dialysis service area that is compliant with the licensing and accreditation requirements imposed by the Department of Health (DOH) and Philippine Health Insurance Corporation (PhilHealth). The dialysis service area shall have the necessary personnel, dialysis equipment and supplies for both hemodialysis and peritoneal dialysis, as required by the DOH and the PhilHealth of private dialysis clinics.

All patients diagnosed with ESRD shall be referred to a DOH-accredited transplant facility to receive orientation and counseling on the advantages of undergoing transplantation as the best treatment for kidney failure. They shall likewise undergo medical evaluation for suitability of transplantation. All potential organ donors of the patient shall be evaluated to determine compatibility. If no living donors are available, the patient shall be enrolled in the deceased organ donor waiting list to ensure that all patients with ESRD have the option to avail of kidney transplantation.

SEC. 5. Chronic Kidney Disease (CKD) Prevention and Health Promotion. - All national, regional, and provincial government hospitals, and stand-alone dialysis facilities shall establish CKD prevention strategies and health promotion activities which shall include advocacy activities targeting relatives of dialysis patients who are at high risk in developing CKD themselves, the provision of instructional materials on the common symptoms of kidney disease and regular conduct of educational activities such as healthy diet and lifestyle, availment of regular tests to diagnose kidney disease, information on the most common causes of kidney failure, and advisories on the appropriate protocols for the diagnostic evaluation of possible kidney disease.

Patients and their relatives shall be informed on the availability of the proper medicines from government health centers such as those for diabetes and hypertension, and the importance of the regular intake of medicines and monitoring of kidney function through regular laboratory testing and check-up by a qualified physician. All activities pertaining to the aforementioned programs shall be documented accordingly.

SEC. 6. The cost of organ retrieval and machine perfusion shall be established by the DOH-Philippine Organ Donation and Transplantation Program to be observed by all organ procurement organizations or organ and tissue retrieval units.

The PhilHealth benefit package for kidney transplantation shall cover the evaluation and screening of the kidney donor and recipient up to the transplant and post-transplantation procedures and remedies and shall include cases involving ESRD patients.

In order to support kidney transplantation as the best treatment option that provides the highest quality of life for ESRD patients and ensures the return of the patient to full rehabilitation, the PhilHealth shall provide lifetime support for all maintenance immunosuppression of the transplant patient, as long as the transplanted organ is functioning and the patient remains dialysis-independent.
