18TH CONGRESS
First Regular Session
HOUSE BILL NO. 984

Introduced by Representative Michael L. Romero

EXPLANATORY NOTE

Article II, Section 15 of the 1987 Constitution provides that “the state shall protect and promote the right to health of the people and instill health consciousness among them. The World Health Organization (WHO) also affirms that “the enjoyment of the highest attainable standard of health is one of the fundamental rights of every human being without distinction of race, religion, political belief, economic or social condition.” However, access to health care has become an issue of capacity to pay.

While the state remains struggling to provide free health care to its people, legislation should be geared towards ways to bring free or affordable health care to indigent patients.

This bill seeks to encourage medical doctors to render free medical services to indigent patients through a provision of tax incentive. This will serve as a token of appreciation to medical practitioners who render public service to the underprivileged and needy patient.

Earnest approval of this bill is hereby requested.

MICHAEL L. ROMERO Ph.D.
