EIGHTEENTH CONGRESS
First Regular Session
HOUSE BILL NO. 2567

Introduced by Rep. Precious Hipolito Castelo

EXPLANATORY NOTE

Accidents on the roads caused by motor vehicles of various classes can be prevented especially those of Class C vehicle types like those buses or trucks engaged in passenger service or freight or cargo.

In short, the vehicle itself, depending on its state of maintenance and roadworthiness is the culprit whenever road accidents happen. The common reasons like faulty brakes, faulty steering, tire blow-outs, among others are heard time and again as the causes.

Let us put an end to accidents to the level that sound vehicle maintenance could guarantee. This means that before an engine conks out, the owner and/or operation should have already located the potential source via an honest-to-goodness observance of vehicle preventive maintenance.

Those who ignore this proposed law shall henceforth be made to account as even the most ordinary vehicular accident could readily claim lives that should not have been waster in the first place.

Thus, to prevent loss of lives, costly indemnities or repairs, related financial losses and possible cancellation of licenses or franchises, strict implementation of vehicle preventive maintenance has now become a must under risk that violation of which will be dealt with severely.

The immediate passage of this measure is prayed for.
