HOUSE BILL NO. 8628

Introduced by Representatives Lord Allan Jay Q. Velasco
and Stella Luz A. Quimbo

AN ACT PROVIDING FOR ADDITIONAL MECHANISMS TO ACCELERATE
THE RECOVERY AND BOLSTER THE RESILIENCY OF THE PHILIPPINE
ECONOMY, PROVIDING FUNDS THEREFOR AND FOR OTHER PURPOSES

EXPLANATORY NOTE

On March 24, 2020, soon after the President declared a state of emergency due to
COVID-19 and imposed the first community quarantine measures, the Bayanihan to
Heal as One Act (Bayanihan I) was enacted. It granted the President emergency
powers to better equip the government in addressing the pandemic and in providing
aid to our compatriots. Bayanihan I helped build the capacity of the health care sector
and provided immediate relief to those whose livelihoods had been disrupted by the
lockdown, particularly through social amelioration and cash-for-work programs. This
law expired in June with the adjournment of Congress’ first regular session.

As the COVID-19 pandemic continues and with no end in sight, we have seen its
increasingly negative impact on our economy and on people’s livelihoods. In June, the
Philippine Statistics Authority (PSA) reported a record-high in unemployment at 7.3
million Filipinos (17.7 percent) as of April 2020. With the need for government to turn
its attention towards supporting businesses and restoring jobs, Congress enacted the
Bayanihan to Recover as One Act (Bayanihan II), which allocates a total of 165 billion
pesos towards the country’s COVID-19 health and economic response.

Similar to its predecessor, Bayanihan II granted emergency powers to the Executive
to help combat the pandemic and included measures for health care and social
amelioration. Moreover, Bayanihan II placed more emphasis on economic response and recovery through unemployment assistance, capital infusion to government financial institutions for low-interest loans and credit guarantees, regulatory relief for loans, rent, and utilities, and assistance to businesses in impacted sectors, among others.

While these pieces of legislation increased government’s initial capacity to respond to the demands of the ongoing crisis, they were not sufficient for the genuine economic recovery of the country. On January 28, 2021, the PSA reported that the Philippine economy contracted by 9.5 percent overall in 2020, the worst performance in our post-war history. This contraction is significantly deeper than the predicted contraction of 4.5 to 6.6 percent, which was the DBCC’s basis for the 2021 national expenditure program. Given that actual economic output in 2020 was far below what was assumed for budget purposes, and further losses may still be incurred as the COVID-19 pandemic is expected to prevail well into the current fiscal year, an additional economic stimulus package is needed to help the government meet its recovery targets for the year.

As part of our country’s response to the COVID-19 pandemic, this bill proposes to allocate 108 billion pesos for additional social amelioration to impacted households, 100 billion pesos for capacity building to impacted sectors, 52 billion pesos for wage subsidies, 70 billion pesos for capacity building for agricultural producers, 30 billion pesos for internet allowances to students and teachers, 30 billion pesos for assistance to displaced workers, 25 billion pesos for COVID-19 treatment and vaccines, and 5 billion pesos for the rehabilitation of areas impacted by recent floods and typhoons.

Uncertainty is the primary effect this pandemic has on every aspect of our lives. Faced with continued risk and uncertainty, household consumption has significantly declined, contributing as much as 5.7 percent to the total 9.5 percent annual reduction in output in 2020. Government must therefore take the lead to promote business and consumer confidence and social welfare. Increased, well-targeted spending is a vital step to achieving these goals.

In view of the foregoing, the swift passage of this measure is earnestly sought.
